Introduction

WHAT IS A BRAND?

The RTI brand is one of our most important company assets. It is the impression we make in the world and how that results in how others feel about the company. It is influenced by the way the company looks, behaves, talks and more. People trust your brand when their experiences with the company consistently meet or exceed their expectations.

So how do we influence this feeling? By controlling our "impressions." Everything we do or don't do creates the brand — the way we answer the phone, the way our website looks, the way we describe our technology, the way the product works, the way we respond to problems and the way the press writes about us.

REINFORCING THE BRAND

The only way to control the brand is to control the impressions, to make sure every impression consistently reinforces the same thing.

This document contains guidelines on how to visually represent the RTI brand. These pages contain specifications for the logo, typography, imagery, and colors that support the RTI personality and promise. It also contains templates for presentations, document examples, and more. These principles of usage should be applied in all written and visual communications, across all types of media.

Please take time to read, understand and execute on what is contained in this document to ensure our visual identity and brand are consistently represented. If you have any questions on this material, please contact marketing_dept@rti.com.

About RTI

TAGLINE

"Your systems. Working as one."

"RTI runs a smarter world."

ELEVATOR PITCH

- The infrastructure software company for smart-world systems.
- The world's leading software framework for intelligent distributed systems.

Real-Time Innovations (RTI) is the infrastructure software company for smart-world systems. RTI is the best in the world at connecting intelligent, distributed systems. These systems improve medical care, make our roads safer, improve energy use, and protect our freedom. RTI leads the transition to intelligent real-world systems, the most important technology trend for the next decade and beyond. RTI's mission is to enable a new generation of intelligent distributed systems, boldly seeking to transform entire industries. We particularly seek applications that promote a sustainable, safe, green and healthy planet.

Real-Time Innovations (RTI) supplies the world's leading software framework for intelligent distributed systems, with over 2,000 designs. We lead the transition to intelligent real-world systems, the most important technology trend for the next decade and beyond.

Boilerplate (2024)

Real-Time Innovations (RTI) is the infrastructure software company for smart-world systems. RTI Connext® is the world's leading software framework for intelligent distributed systems. Uniquely, Connext users can build systems that combine advanced sensing, fast control, and AI algorithms.

With 2,000 customer designs, RTI excels at getting customers to production. RTI software runs over 250 autonomous vehicle programs, supports dozens of automotive ADAS and software-defined architectures, controls the largest power plants in North America, integrates over 400 major defense programs, drives a new generation of MedTech systems and robotics, and underlies Canada's air-traffic control and NASA's launch control systems.

RTI runs a smarter world.

RTI is the leading vendor of products compliant with the Data Distribution Service (DDS™) standard. RTI is privately held and headquartered in Silicon Valley with regional offices in Colorado, Spain, and Singapore.

RTI Connext

RTI Connext® is the world's leading software framework for intelligent distributed systems. Uniquely, Connext users can build systems that combine advanced sensing, fast control, and AI algorithms.

Our RTI Connext software framework makes it possible to design and deploy intelligent real-world systems in demanding environments.

- Connext applies the concept called data centricity, based on the Data Distribution Service (DDS™) standard.
- Instead of sending messages, a data-centric system makes all data available to every device and algorithm in local memory with controlled timing.
- Autonomous systems need data centricity because artificial intelligence (AI) algorithms require huge amounts of data with very specific delivery requirements.
- Connext securely shares information in real time so distributed systems work together as one.

Logo

CORPORATE LOGO

The corporate logo is a stylized version of the acronym “RTI.”

LOGO WITH TAGLINE

When with the wordmark, the tagline “Your systems. Working as one.” can appear stacked below or to the right of the logo.

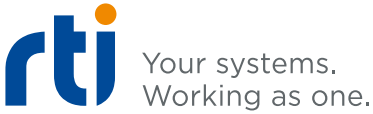

CORPORATE LOGO COLORS

RTI Blue with RTI Orange dot of the “i.” Depending on the application and background, the logo may be in white while maintaining the RTI orange dot. A RTI Blue background or similar dark background is preferred with this variation.

There may be situations where a RTI logo cannot be in full color. The RTI can be reversed out in white or solid black.

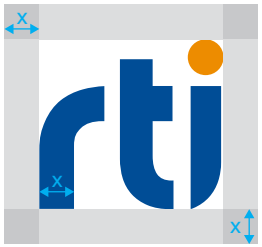

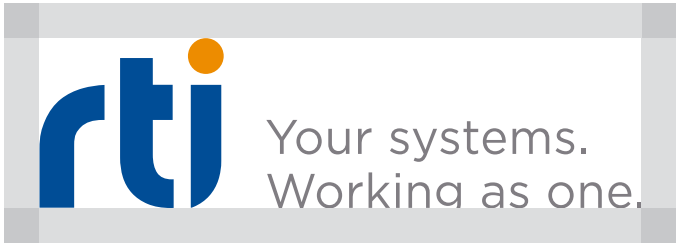

Logo

CLEAR SPACE

The minimum required clear space is “x” that equals the width of the bottom of the “r” in the RTI logo.

This applies as well if the tagline is included. No graphic elements or words can infringe on this clear space.

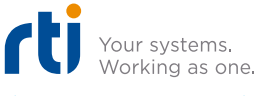

SIZING

This is the minimum width for the logo only and with the tagline. If either logo treatment needs to be smaller, please contact marketing_dept@rti.com for approval.

Do not skew or modify the RTI logo’s shape or colors. Do not use the RTI logo on a patterned, photographic or colored background where it may obstruct the clarity of the logo.

Logos are available for use on Marketing’s Confluence page.

Color Palette

Primary colors should be used in the majority of applications.

Secondary colors should be used in conjunction with the primary colors, but not as the main colors.

PRIMARY

	PRINT		DIGITAL	
	Pantone	CMYK	RGB	Hex
RTI Blue	PMS 2945 C	100 / 80 / 9 / 0	0 / 76 / 151	#004C97
RTI Orange	PMS 144 C	5 / 53 / 100 / 0	237 / 139 / 0	#ED8B00
RTI Gray	PMS 10 C	62 / 52 / 48 / 19	99 / 102 / 106	#63666A

SECONDARY

	PRINT		DIGITAL	
	Pantone	CMYK	RGB	Hex
RTI Light Blue	PMS 306 C	71 / 6 / 4 / 0	0 / 181 / 226	#00B5E2
RTI Light Orange	PMS 137 C	0 / 42 / 100 / 0	255 / 163 / 0	#FFA300
RTI Green	PMS 367 C	40 / 0 / 81 / 0	164 / 214 / 94	#A4D65E
RTI Light Gray	PMS Cool Gray 4 C	27 / 21 / 22 / 0	187 / 188 / 188	#BBBCBC

Typography

PRINT & DIGITAL

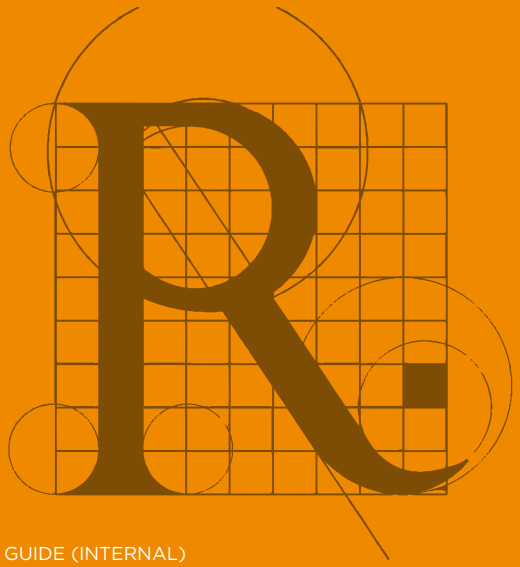

For branded assets that are not web copy, RTI uses **Gotham** and **Gotham Narrow** font families. There are a variety of weights available.

WEB

For web copy, **Roboto Condensed** for headlines and **Montserrat** for paragraph text are used. Web banners and e-mail signatures use Gotham and Gotham Narrow.

PRESENTATION

For Microsoft PowerPoint and Google Slides, both title and body copy use **Avenir Next**.

Collateral

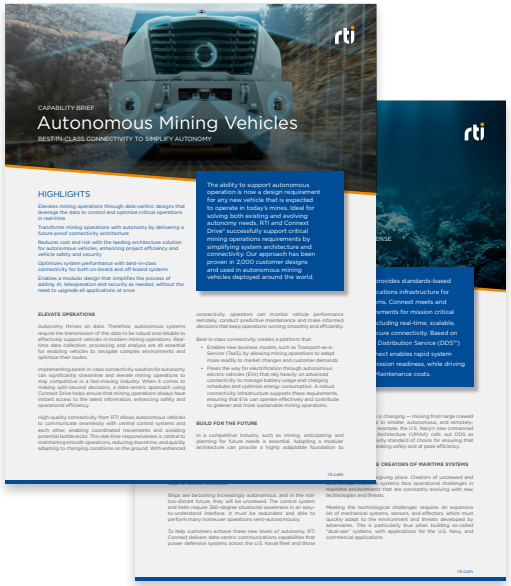

Collateral can be accessed in the **Resource Library** of the website.

EXECUTIVE BRIEFS

DATASHEETS

CAPABILITY BRIEFS

CUSTOMER SNAPSHOTS

WHITEPAPERS

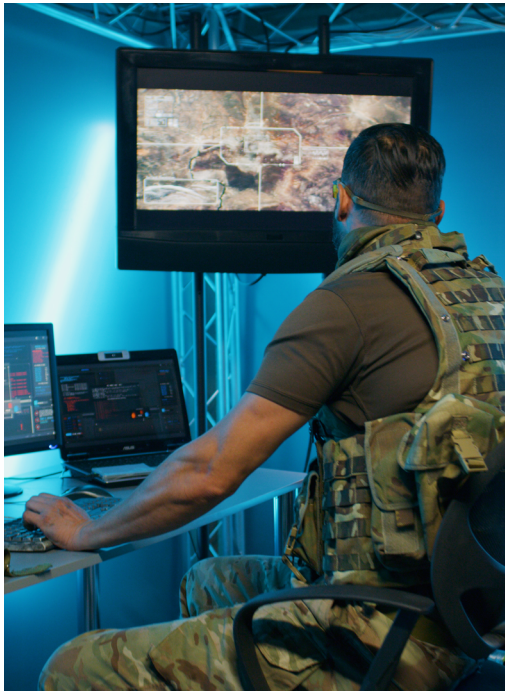

Imagery

LIFESTYLE

Since RTI works in many real-world applications, the lifestyle images should reflect that in an impactful and tasteful manner. Images that show scale, dynamic movement, or complexity are preferred.

Marketing's Image Library is available for use and can be found in **Marketing's Image Library**. In addition, images can be requested using the **Creative Services Request** form.

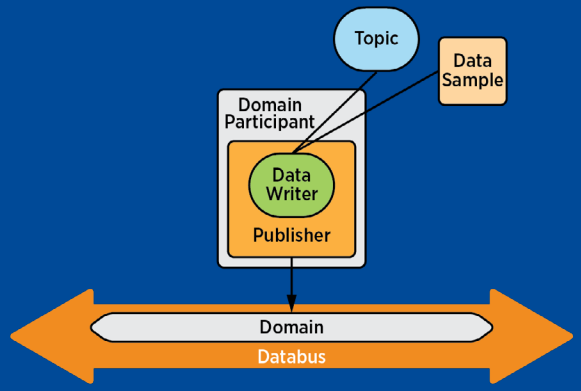

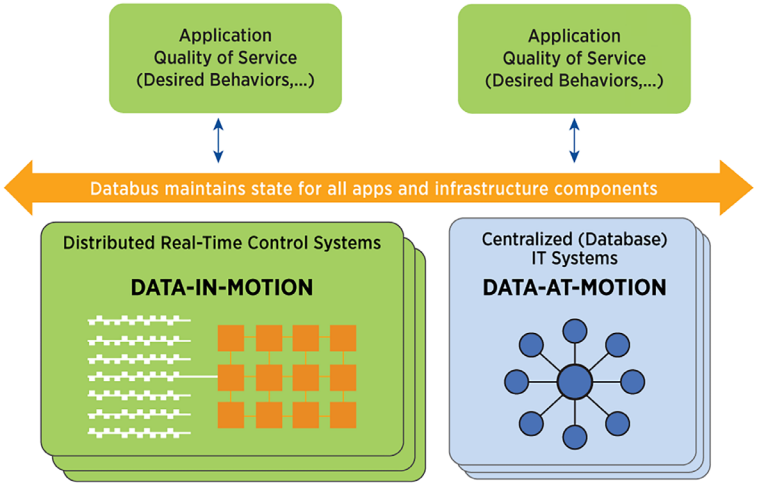

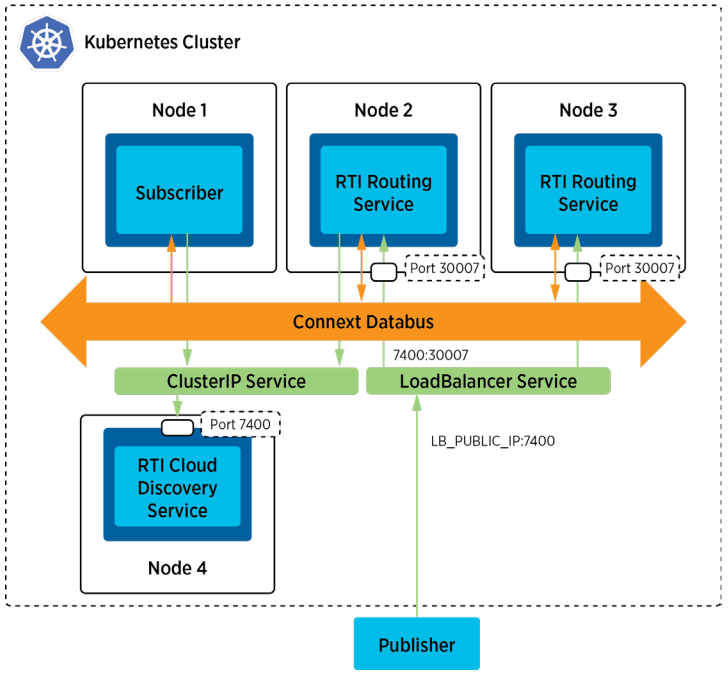

Imagery

DIAGRAMS

Since RTI deals with complex software, diagrams are used to help illustrate what is going on. These diagrams should be concise, organized well, and use the RTI brand colors.

Imagery

ICONOGRAPHY

RTI uses iconography to visually represent concepts and ideas in its diagrams and other assets. Examples are shown here.

Icons are available for the corporate PowerPoint and Google Slides templates on **Marketing's Confluence page**.

Imagery

RTI CONNEXT

RTI Connext software is accessible through the RTI Launcher. Icons and user interface elements provide an intuitive experience as users build the next generation of systems.

LOAD SCREEN

APP ICONS

BUTTONS

Presentations

RTI has its own branding presentation theme to showcase its technology to an audience. Presentations should be concise, organized, and help tell the RTI story.

The template includes both dark and light versions of the theme.

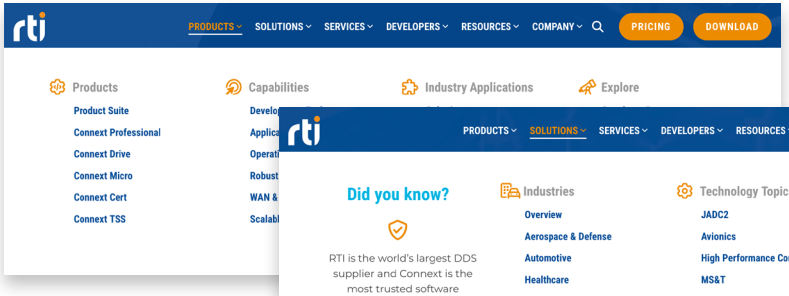

The corporate PowerPoint and Google Slides templates can be found on **Marketing's Confluence page**.

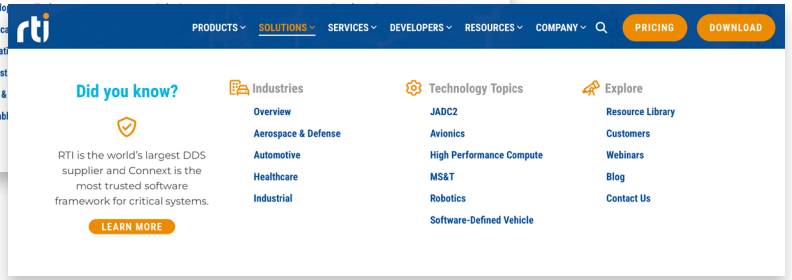

Website

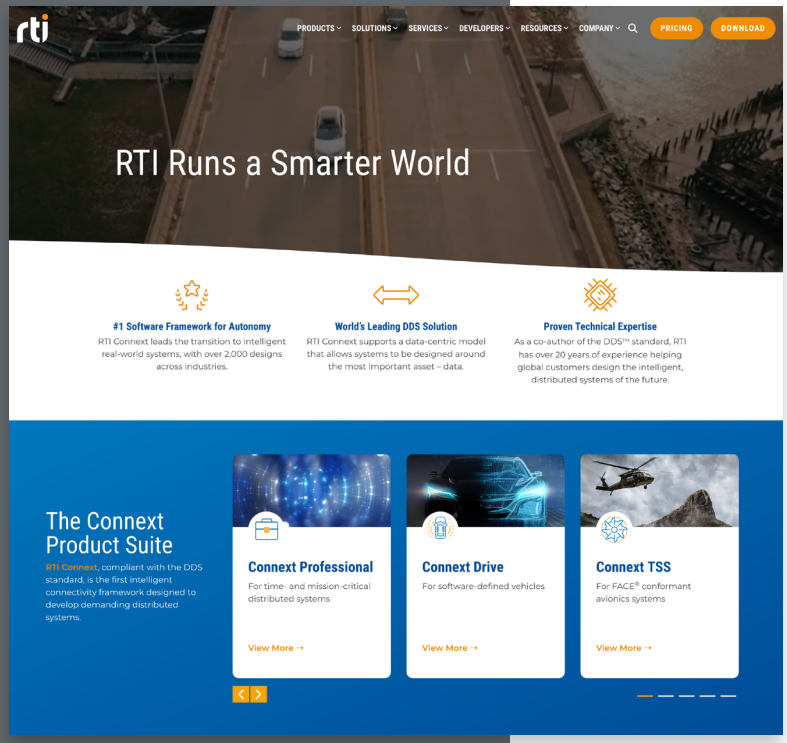

The RTI website is one of the main touchpoints for awareness, education, and customer experience.
